

FISHERY PRODUCTS

ORIGIN : PERU

YEAR : 2020-2021

A diverse number of species in our coastline contain high levels of omega 3 (EPA and DHA), essential amino acids and vitamins A, B, D and E, that provide extraordinary health benefits and improve the quality of life.

OUR COMPARATIVE ADVANTAGES

VARIETY AND QUALITY
Peru is positioned worldwide as a major trading partner and global supplier of fishery products. We offer a myriad of marine and continental species, both native and introduced.

SUSTAINABLE FISHERIES AND AQUACULTURE
The official sanitary authority of the Peruvian Government monitors the hygienic conditions in the farming, extraction and processing of all products. The processing plants' proximity to the freshness of the seafood are in compliance with international standards.

SAFETY AND SECURITY:
The fishing and environmental regulations are in compliance with international standards which ensure a friendly extraction and farming with the environment, as well with a sustainable management approach.

Great exportable supply

makes Peru an important commercial partner and one of the main suppliers of fishery products in the world
